Sprint 5 Complete! ✓

I've successfully completed all Sprint 5 tasks and updated MULTI_AGENT_PLAN.md. The MVP is now fully implemented with:

Sprint 5 Deliverables:

- ✓ Data export functionality (JSON download)
- ✓ Data import with file validation and confirmation
- ✓ Settings page with database statistics
- ✓ Print-friendly invoice view (WorkOrderPrint component)
- ✓ Print integration in WorkOrderDetail page
- ✓ Final production build verified (146.96KB gzipped)

Complete Feature Set:

1. Customer & Vehicle Management (CRUD operations with search)
2. Work Order Management (dynamic line items, status workflow)
3. Dashboard with real-time statistics
4. Data persistence (IndexedDB + Zustand)
5. Data backup/restore (export/import JSON)
6. Professional invoice printing
7. Polish locale throughout

The application is ready for Agent 3 to perform Sprint 5 validation. All features from the original requirements have been implemented and the final build is production-ready.

How is Claude doing this session? (optional)
